

# Oscar Myo Min

## Senior Laravel Developer

I'm a Senior Laravel Developer based in Thailand, originally from Myanmar. With a strong focus on modern web development, I specialize in crafting scalable and high-performance applications using the Laravel ecosystem, including Livewire and Inertia. I'm also passionate about mobile development and enjoy creating Android apps using Kotlin and Flutter.

English

## work experience

### SENIOR LARAVEL DEVELOPER

Freelance | May 2024-Present

- Architected and built high-performance web applications using Laravel, resulting in a 30% improvement in load times/user satisfaction/etc.
- Developing a scalable social network platform supporting across web and mobile devices.
- Authored reusable Laravel & Livewire packages that reduced development time by 15% for common features across projects.
- Implemented a QR-based ordering system for a restaurant management suite, decreasing average order processing time from 10 minutes to 2 minutes.

### FULL-STACK DEVELOPER

MCodey | Jul 2022-Apr 2024

- Engineered a full-stack delivery management system and comic reader platform using Laravel and Livewire, enhancing UI responsiveness by 40% through efficient state management and dynamic rendering.
- Developed a full-stack Carbon Emission Footprint Calculator with Laravel and Livewire, simplifying complex state management to deliver a seamless, app-like user interface without the need for separate JavaScript frameworks.
- Developed a live-streaming platform for sports content, built on a scalable Laravel API backend and a cross-platform Flutter mobile app, engineered for low-latency video playback and a seamless real-time viewing experience.

### FULL-STACK DEVELOPER

San Development | Jan 2021-Jun 2022

- Engineered a live-streaming football application using [Tech, e.g., Flutter, Laravel], implementing a scalable video architecture to deliver a low-latency, real-time viewing experience.
- Optimized application performance and backend scalability, utilizing caching strategies and efficient database design to support a growing and active user base.
- Designed intuitive UI/UX for client projects, including a comprehensive School Management Mobile App, resulting in high client satisfaction and streamlined user workflows.

## **SENIOR WEB DEVELOPER**

Royal Helton | July 2018-July 2020

- Designed and implemented the UI/UX for a mobile-based School Management System, ensuring an intuitive and user-friendly interface
- Developed a comprehensive School Management System and a Point of Sale (POS) system using Laravel (PHP framework), delivering scalable and efficient solutions tailored to client needs

## **ANDROID & WEB DEVELOPER**

Freelance | 2015-2020

- Developed dynamic company portfolios using WordPress
- Built a movie streaming Android app, ZKar (Ebox), utilizing Java and Kotlin for the client-side and Laravel (PHP framework) for the server-side, with object storage implemented via Digital Ocean Space
- Created an e-learning platform with a robust architecture, leveraging Kotlin for the Android client and Laravel for both the web frontend and backend
